

I personally benefit by using XM radio's local traffic and weather service. As an RV'er I can't wait until this service is made national. Today's radio is worthless outside metro areas. Driving into LA from the west, the Palm Springs area, gives you no AM service that is useful outside LA. Please vote to have XM expand their service to the rest of the nation. We all want talk radio, news, weather and traffic information BEFORE we are in the middle of the problem. Let us know before we come into metro areas what we can expect!!

Thanks
